Apa itu Scopus

Scopus is the largest abstract and citation database of peer-reviewed literature: scientific journals, books and conference proceedings. Delivering a comprehensive overview of the world's research output in the fields of science, technology, medicine, social sciences, and arts and humanities, Scopus features smart tools to track, analyze and visualize research.

Scopus menampilkan alat-alat pintar untuk melacak, menganalisis, dan mengvisualisasikan penelitian.

Alamat homepage Scopus adalah: <https://www.scopus.com>

Menggali Manfaat Scopus

Identifying and analyse which journals to read or submit to

Helping researchers manage career – citation counts and h-index

Deciding what, where and with whom to collaborate

Tracking impact of research; monitor global research trends

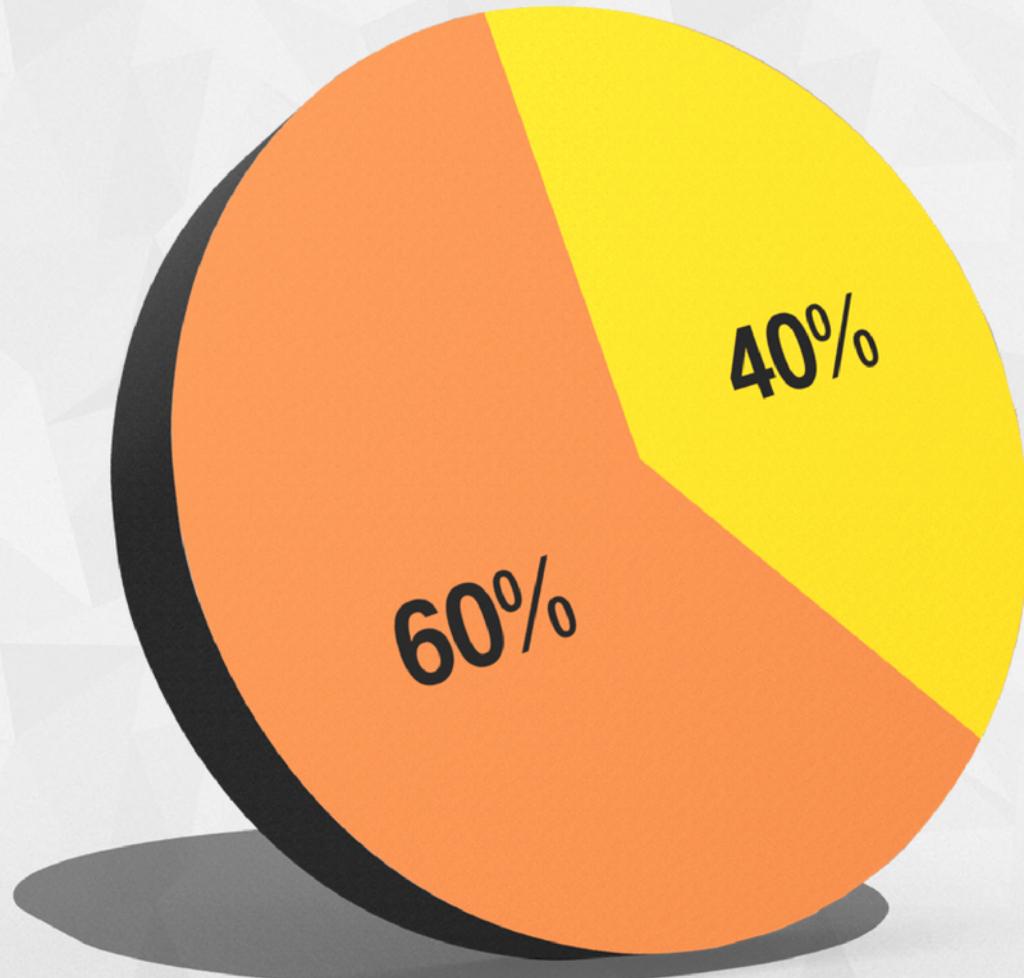

Finding out what already exists in the global world of research

Determining how to differentiate research topic and find ideas.

How Scopus works?

ScimagoJournal Rank

Indikator **Scimago Journal Rank (SJR)** adalah ukuran dari pengaruh ilmiah jurnal ilmiah yang menyumbang jumlah kutipan yang diterima oleh jurnal dan pentingnya atau prestise jurnal tempat kutipan berasal.

SJR jurnal adalah nilai numerik yang menunjukkan jumlah rata-rata kutipan tertimbang yang diterima selama tahun dipilih per dokumen yang diterbitkan dalam jurnal selama tiga tahun sebelumnya. Nilai SJR yang lebih tinggi dimaksudkan untuk menunjukkan prestise jurnal yang lebih besar. Alamat homepage SJR adalah <https://www.scimagojr.com>

Tampilan Scimago JR

A screenshot of the ScimagoJR website. The top navigation bar includes links for "Journal Rankings", "Country Rankings", "Viz Tools", "Help", and "About Us". Below the navigation is a large orange header with the text "SJR" and "Scimago Journal & Country Rank". A search bar is located below the header. The main content area is titled "WHAT IS SCIMAGOJR FOR?" and features three icons: "JOURNAL RANKS" (book icon), "COUNTRY RANKS" (globe icon), and "VIZ TOOLS" (bar chart icon). A footer at the bottom contains the text "This website uses cookies to ensure you get the best experience on our website" and a "Got it!" button.

Quartile dalam Perangkingan Jurnal

Bagaimana Menentukan Topik

- **Bidang ilmu** yang kita tahu
- **Menarik**, utamanya bagi peneliti itu sendiri
- Problem **jelas**
 - Mengandung **pengetahuan dasar**
- **Terbatas**, walaupun bersifat dasardan umum, topik haruslah tetap terbatas pada satu bidang tertentu.
- Memperhatikan **proses pengumpulan data**
 - Memiliki **manfaat**

Title

What should be in the Title:

Objective, Method and Significant

The title should convey the objective/purpose, method and significant of the paper. The nicer the better.

Example :

Digital Marketing to Improve Marketing Performance of SMEs

method

significant

objective

Keywords

- Variabel yang ada pada judul dipecahkan dan ditambah variable yang ada dalam paper. Terdiri dari 4-6 kata atau kata majemuk.
- Bagi penulis fungsi keywords adalah untuk menuntun mencari referensi dalam menyusun sebuah Paper
- Example

Title: Digital Marketing to improve marketing performance of SMEs

Keyword: Digital Marketing , Marketing Performance, Mobile Marketing, SMEs

Enter relevant keywords for your paper

Keyword yang betul dapat dicek di paper jurnal yang sudah diterbitkan

Abstract

The abstract should be written as a **continuous paragraph** with **200-250 words** and recapitulative state:

- The background of the research
- **Purpose**
- **Methodologies**
- **Principal results**
- **Major conclusions**
- Its contributions to the field.
- **Do not** use first person, do not include mathematical expressions, do not refer to the reference, and try to avoid acronyms
- Abstract should **emphasize new or important aspects** of the study.

Write The Paper in a Different Order.

Komponen Paper

- Judul Penelitian (Title page)
- Abstrak (Background, Tujuan paper, Metode riset, Kesimpulan dan Impact)
- Kata Kunci (Keywords)
- Pendahuluan (introduction)
- Metode (Methods)
- Hasil dan Diskusi (Results and Discussion)
- Kesimpulan (Conclusions)
- Ucapan Terimakasih (Acknowledgements)
- Daftar Pustaka (References)

Kata sambung yang sering digunakan

- Pada kenyatannya,
- Umumnya,

- Namun,
- Akan tetapi,

- Untuk itu,
- Penting untuk dilakukan penelitian
- Mendesak untuk dilakukan penelitian

Hal yang perludisiapkan hari ke-2:

- Membuat paper berbahasa Indonesia 4-5 halaman sesuai Anatomy dan Urutan komponen sistematika.
- Paper ini disiapkan untuk diterjemahkan ke dalam bahasa Inggris setelah Anatomi Paper BETUL

Target Capaian Hari Ke-2:

1. Memperbaiki Anatomi paper.
2. Identitas Paper
 - a. Insert References kedalam Mendeley
 - b. Perbaikan Meta Data Mendeley
3. Digital writing
 - a. Translate, Sitasireferensi
 - b. Paraphrase
 - c. Grammarly
4. Menemukan Target Jurnal Tujuan
 - a. Find a Journal Target
 - b. Memahami Author Guideline

Digital Wrirting: Menterjemahkan, sitasi, dan parafrase

Prasyarat

- Paper sudah siap dalam Bahasa Indonesia
- Anatomi dan Tata Urutan Paper sudah benar
- Telah memiliki referensi 30-50 paper terbaik (gold, Q1, Q2) dan sudah ditambahkan di Mendeley offline.
- Berburu references dgn Android/iPhone dan Macbook /Laptop
- Referensi dalam Mendeley offline sudah diperbaiki, sehingga Identitas Referensi sudah benar

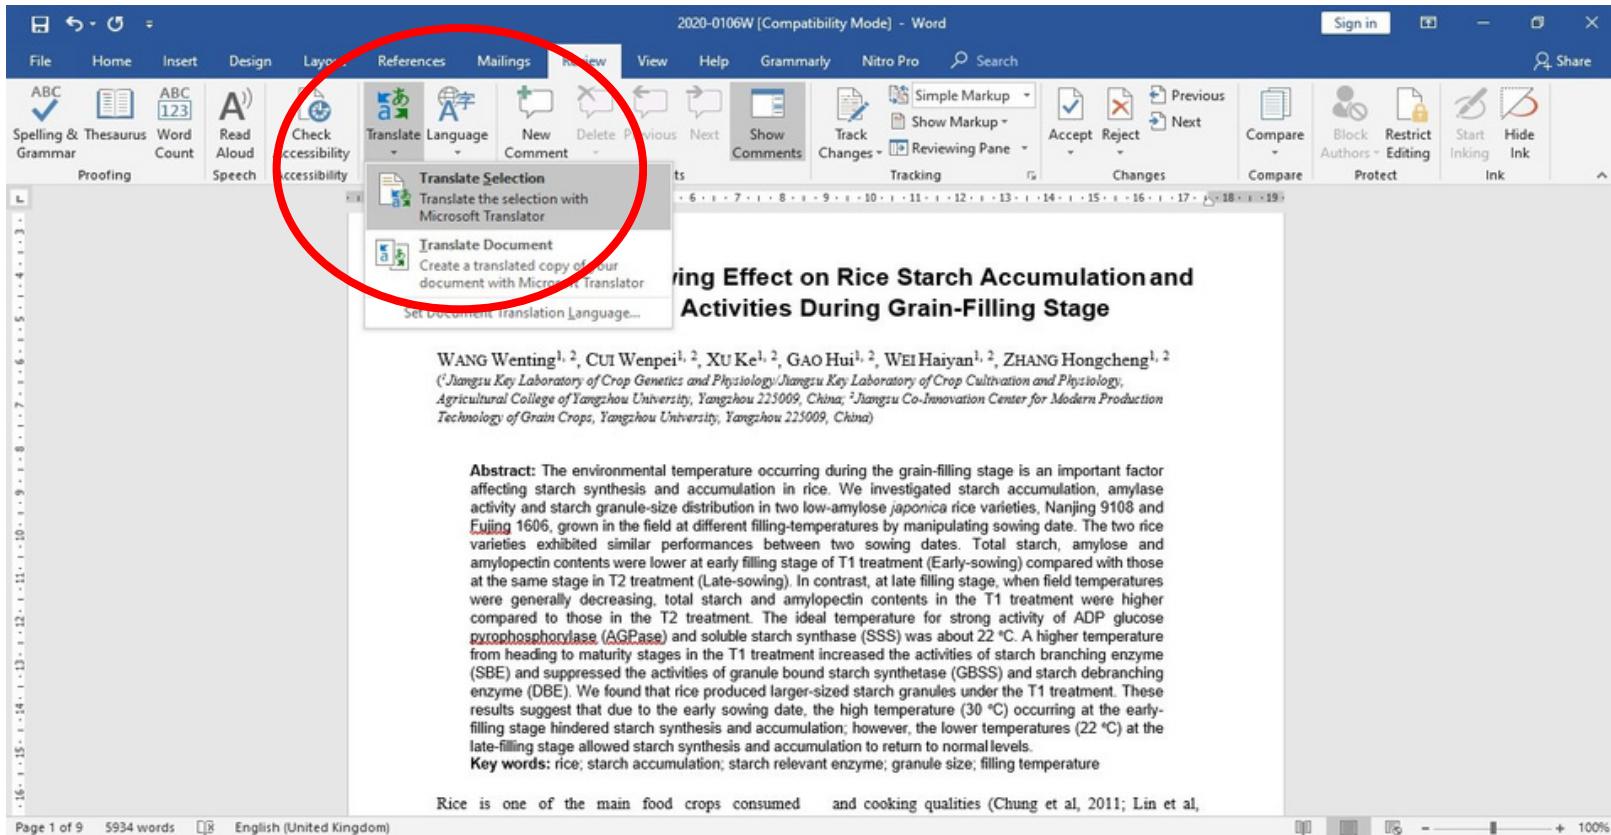

Menerjemahkan dan Sitas

Alat yang digunakan:

- Microsoft word yang sudah Add-in dengan Mendeley dan Grammarly
- Mendeley Desktop
- Mendeley Cite
- Mendeley Reference Manager
- Koneksi internet bagus

Translate pada Microsoft Word

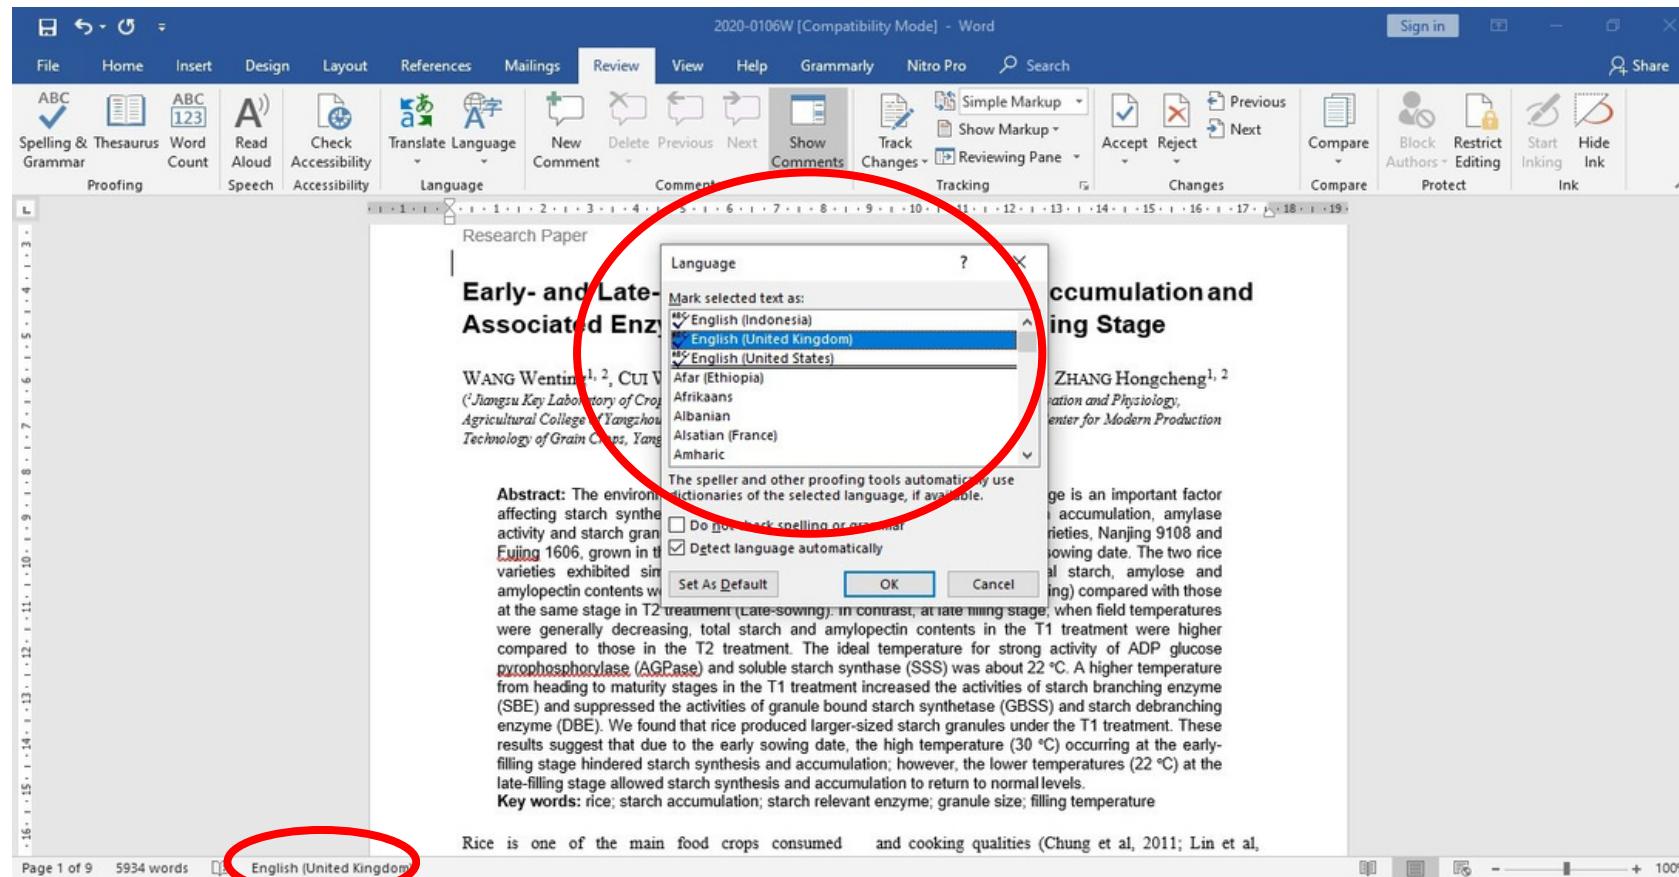

The screenshot shows a Microsoft Word document titled "2020-0106W [Compatibility Mode] - Word". The "Mailings" tab is selected in the ribbon. A red circle highlights the "Check accessibility" button in the "Proofing" group. A dropdown menu is open from this button, showing options: "Translate Selection" (selected), "Translate Document", and "Set document translation language...". The main content of the document is an article abstract about rice starch accumulation.

Abstract: The environmental temperature occurring during the grain-filling stage is an important factor affecting starch synthesis and accumulation in rice. We investigated starch accumulation, amylase activity and starch granule-size distribution in two low-amylase japonica rice varieties, Nanjing 9108 and Fujing 1606, grown in the field at different filling-temperatures by manipulating sowing date. The two rice varieties exhibited similar performances between two sowing dates. Total starch, amylose and amylopectin contents were lower at early filling stage of T1 treatment (Early-sowing) compared with those at the same stage in T2 treatment (Late-sowing). In contrast, at late filling stage, when field temperatures were generally decreasing, total starch and amylopectin contents in the T1 treatment were higher compared to those in the T2 treatment. The ideal temperature for strong activity of ADP glucose pyrophosphorylase (AGPase) and soluble starch synthase (SSS) was about 22 °C. A higher temperature from heading to maturity stages in the T1 treatment increased the activities of starch branching enzyme (SBE) and suppressed the activities of granule bound starch synthetase (GBSS) and starch debranching enzyme (DBE). We found that rice produced larger-sized starch granules under the T1 treatment. These results suggest that due to the early sowing date, the high temperature (30 °C) occurring at the early-filling stage hindered starch synthesis and accumulation; however, the lower temperatures (22 °C) at the late-filling stage allowed starch synthesis and accumulation to return to normal levels.

Key words: rice; starch accumulation; starch relevant enzyme; granule size; filling temperature

Pemilihan Bahasa Microsoft Word

The screenshot shows a Microsoft Word document titled "2020-0106W [Compatibility Mode] - Word". The document contains a research paper abstract about rice starch synthesis. A red circle highlights the "Language" dialog box, which is open over the document. The dialog box shows the following options:

Mark selected text as:
English (Indonesia)
English (United Kingdom) **English (United States)**
Afar (Ethiopia)
Afrikaans
Albanian
Alsatian (France)
Amharic

The speller and other proofing tools automatically use dictionaries of the selected language, if available.
 Do not check spelling or grammar
 Detect language automatically

Set As Default OK Cancel

Below the dialog box, the status bar shows "Page 1 of 9 5934 words" and "English (United Kingdom)".

MS Word Add-in Grammarly

The screenshot shows a Microsoft Word document with the ribbon at the top. The 'Grammarly' tab is highlighted with a red oval. Below the ribbon, there's a toolbar with various icons: Close Grammarly Status, Adjust Goals, All Issues (highlighted with a red oval), Correctness, Clarity, Engagement, Delivery, Deactivated Suggestions, Plagiarism, Get Expert Writing Help, Style Guide Business, Settings, and Support. The main content area displays a scientific text about rice starch synthesis, followed by a 'MATERIALS AND METHODS' section and a 'Rice materials' subsection. To the right, a floating 'Grammarly' pane lists 14 grammar suggestions for the text, such as capitalizing 'diphosphate', rewriting 'This', changing punctuation for 'et al.', and adding articles to 'starch'. At the bottom of the pane, it says '247 All issues'.

Rice Science, Vol. 28, No. 2, 2021

diphosphate glucose (ADPG), a starch synthesis substrate. This is the first and limiting step of the starch synthesis reaction (Tuncel et al. 2014). Increasing AGPase activity can regulate starch synthesis and increase seed weight (Smidansky et al. 2003; Tuncel and Okita, 2013). GBSS is mainly responsible for the synthesis of amylose, SSS mainly synthesizes amylopectin, and SBE catalyzes the formation of α -1, 6-glycoside bond while DBE hydrolyzes α -1, 6-glycoside bond (Satoh et al. 2003; Fujita et al. 2009; Jeon et al. 2010). The activities of these five enzymes are closely related to total starch, amylose and amylopectin accumulation in rice endosperm.

Enzymes involved in starch accumulation are not only affected by genotype but also the growing environment of rice (Halford et al. 2015; Mayer et al. 2016). Many previous studies found that abiotic factors such as fertilizer application, soil moisture, and environmental temperature can affect enzyme activity and subsequently, change total starch, amylose and amylopectin contents (Sun et al. 2018; Chen et al. 2019; Prathap et al. 2019). Among these factors, enzyme activities are reportedly very sensitive to environmental temperature from the heading to maturity stages (Cao et al. 2015). Moreover,

MATERIALS AND METHODS

Rice materials

Two varieties of *Oryza sativa* L. ssp. *japonica* (Nanjing 9108 and Fujing 1606) were planted at the farm of Yangzhou University, China (119°42' E, 32°39' N) during rice growing season in 2018. The soil type was sandy loam and the preceding crop was wheat. Total availability of nitrogen, phosphorous and potassium were 1.4, 0.25, 1.1 mg/m² and 92.3 mg/m².

ABSTRACT

We investigate whether there are racial and ethnic disparities in children's education in Ethiopia, India, Peru and Viet Nam. We find that in all the four countries, and especially in Viet Nam, children from small ethnic groups have lower education attainment and cognitive ability. The gap in educational attainment and cognitive ability among ethnic children is larger than the gap in school enrolment, and the gap tends to be wider for older children. Using the Oaxaca-Blinder decomposition, we find that the main contribution to the gap in education

My Library The role of technology... Ethnic and racial disp...

The literature is in agreement that there are significant disparities related to race and ethnicity, in access to education services and the labor market. An important source of income inequality within countries is the gap between ethnic majorities and ethnic minorities which impedes economic growth and poverty reduction (Alesina & Rodrik, 1994; Deininger & Squire, 1998; Levin & Bigsten, 2000). Compared to ethnic majorities, ethnic minorities often have lower income and consumption, and as a result, display higher poverty rates.

To a fair degree of consistency, race and ethnicity have been demonstrated to be among the major determinants of economic behavior. An extensive literature suggests that the economic differences observed among individuals and households may have ethnic and racial origins. For example, there is a large stream of literature demonstrating the differences between ethnicity and race for health outcomes (Satcher et al., 2005), access to the labor market and jobs (Bertrand & Mullainathan, 2004; Carmichael & Woods, 2000; Richardson, 2008; Zhu, 1993), education (Leslie, 2005; Thomas & Richardson, 2012), entrepreneurship and self-employment (Ahn, 2011; Fairlie, 2004; Fairlie & Sundstrom, 1999).

In today's social economy, human resource is more than just a simple concept, and its important role in social organizations has been widely recognized by the public (Gong, 2016). Among the major enterprises, human resource management has gradually evolved from the subordinate subsidiary status to the dominant position related to enterprise strategy (Zhang, Yang & Xi, 2014; Coetzer & Sitlington, 2014). In most enterprises, the required human resource management talents are professional technical talents with good professional ethics, solid basic skills and strong practice ability. However, at present, the talent gap in human resource management among enterprises in China is expanded constantly. At the same time, the work quality and practice ability of human resource management talents need to be improved. In colleges and universities in China and even in the world, there is a common situation of human resource management talents,

Innovation on education and training mode of human resource management specialty in colleges and universities from the persp...

A screenshot of a Microsoft Word document titled "Document12". The document contains the following text:

Education is a the main key to improve human resource of nation. At the same time, the work quality and practice ability of human resource management talents need to be improved (Liu, 2018).

The text "At the same time, the work quality and practice ability of human resource management talents need to be improved" is selected and highlighted in blue.

The Microsoft Word ribbon is visible at the top, showing tabs like Home, Insert, Draw, Design, Layout, References, Mailings, Review, View, and Grammarly. The Review tab is currently selected.

A "Translator" sidebar is open on the right, showing the selected text in English and its Indonesian translation:

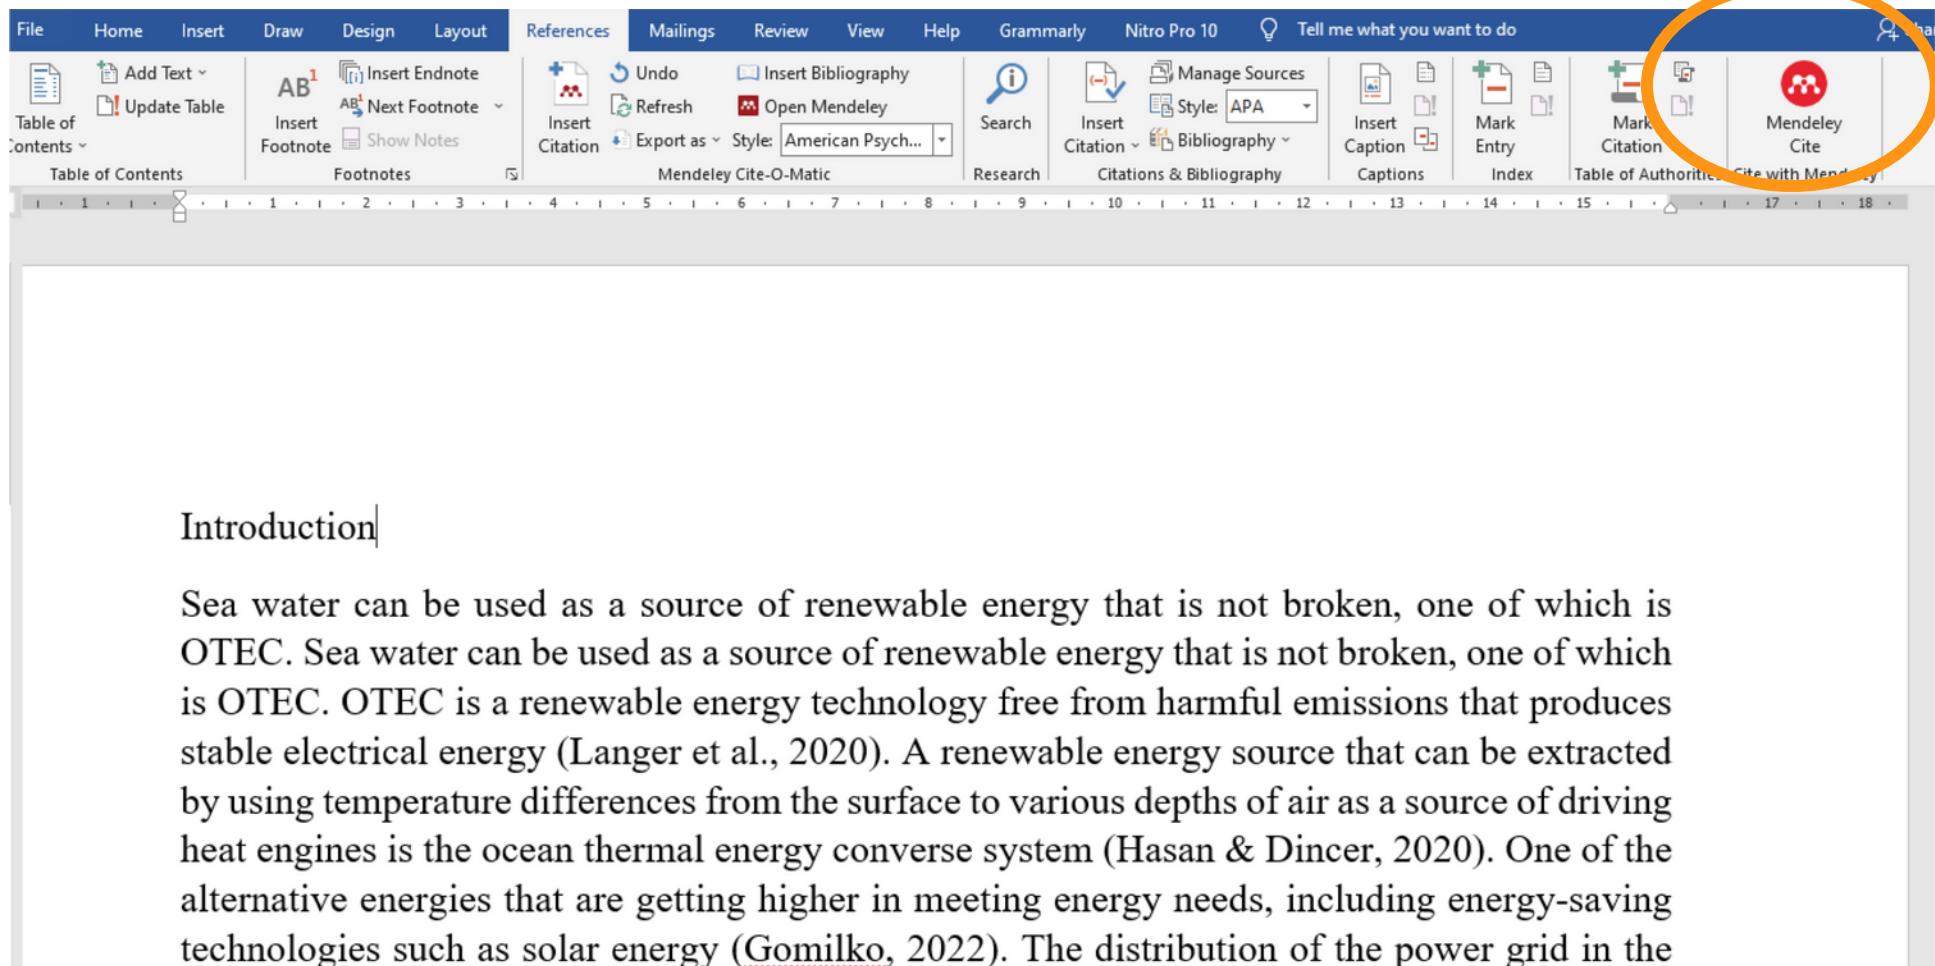

From: English (detected)
At the same time, the work quality and practice ability of human resource management talents need to be improved

To: Indonesian
Pada saat yang sama, kualitas kerja dan kemampuan praktik SDM manajemen sumber daya manusia perlu ditingkatkan

Below the translation, there are lists of translations for words like "human", "man", "human beings", "mankind", and "people".

At the bottom of the screen, the status bar shows "Page 1 of 1 19 of 67 words" and "English (Indonesia)".

CitasidenganM Cite

The screenshot shows a Microsoft Word document with the ribbon at the top. The 'References' tab is selected. A Mendeley Cite-O-Matic add-in is active, displaying a 'Mendeley Cite' sidebar. The sidebar has tabs for 'References' and 'Citation Settings'. In the 'References' tab, there is a list of results. The first result is 'Moreno et al. 2019' with a delete button. Below it is a search bar containing 'energy'. Underneath the search bar, there is a list of results: 'Food, Energy, and Climate Change' by Harvey M. Pilgrim S., 'Food Policy (2011) 36(SUPPL. 1)', and a checked item 'A building energy simulation methodology to validate energy balance and comfort in zero-energy buildings' by Moreno B, Del Ama Gonzalo F, Hernandez I. At the bottom of the sidebar are buttons for 'Insert 1 citation' and 'Cancel'. A large orange circle highlights the 'References' section of the sidebar. Two numbers, '1' and '2', are placed near the bottom right of the sidebar, corresponding to numbered steps below.

CitasidenganM Cite

The screenshot shows a Microsoft Word document with the 'References' tab selected in the ribbon. A callout bubble points to the 'Mendeley Cite' button in the ribbon. The main content area displays the text:

Introduction

Sea water can be used as a source of renewable energy that is not broken, or
1 OTEC (Moreno et al., 2019). Sea water can be used as a source of renewable energy that is not broken, one of which is OTEC. OTEC is a renewable energy technology free from emissions that produces stable electrical energy (Langer et al., 2020). A renewable energy source that can be extracted by using temperature differences from the surface to the bottom of air as a source of driving heat engines is the ocean thermal energy conversion (OTEC) (Langer et al., 2020). One of the alternative energies that are getting higher in meeting the world's energy needs is solar energy (Gomilko, 2022). The use of solar energy in various fields, including energy-saving technologies such as solar energy (Gomilko, 2022). The use of solar energy in various fields, including energy-saving technologies such as solar energy (Gomilko, 2022).

A yellow oval highlights the citation "(Moreno et al., 2019)" in the text. A callout bubble points to this highlighted text, indicating where the citation will appear.

A floating 'Mendeley Cite' sidebar is visible on the right, showing the citation entry for 'Moreno et al. 2019' and search results for 'energy'.

CitasidenganM Cite

The screenshot shows a Microsoft Word document with the following steps highlighted:

- 1** A yellow oval highlights the word "References" in the ribbon menu.
- 2** An orange circle highlights the "Insert Bibliography" button in the Mendeley Cite ribbon.
- 3** A yellow box highlights the citation results for "energy".

The document text discusses seawater temperature at the surface and the depth of the sea, mentioning d'Aronval, a classic technology for generating energy from differences in seawater (Zhang et al., 2020). Surface temperature 28°C and depth temperature 4°C. An evaporator heat exchanger. The sea surface water temperature may fluctuate between 26°C - 30°C (García Huante et al., 2021).

Target Capaian Hari Ke-3

1. Memahami Template, membuat template dengan cepat
2. Finalisasi paper, penyesuaian kebutuhan submit jurnal tujuan
3. Submit Paper

Syarat, Tips and Tricks utk Submit

1. Masuk ke online submission, register paper/[IMRAD](#)
2. **Perhatikan scope Journal yang dituju**
3. **Manuscript harus sesuai Template**
4. **Plagiarism maksimal 20% dan disiapkan untuk dilampirkan**
5. Used [digital tools](#)
6. Cited and used the latest references from Q1 and Q2
7. Involved Research Collaborator with higher h-index

8. No grammatical error
9. Submitting from the lowest level (Q4) atau sekedar Scopus saja
10. Used the proper anatomy of
11. Read carefully and [follow author guideline](#)
12. Citing the target journal 1 or 2 paper

Submit Preparation

Prasyarat lainnya:

- Paper sudah cadas dan dalam Bahasa Inggris
- Sudah diperbaiki tata bahasa dengan Grammarly premium
- Gunakan jasa proofread dan atau Service editing jika perlu
- Cek similarity dengan Turnitin.
- Pilih jurnal sasaran yang sesuai, cermati Author Guideline Journal, dan cari dan download Template (jika ada)
- Siapkan Cover letter jika diminta journal

Template

- Buka template jurnal, letakkan cursor di salah satukata / kalimat.
- Klikformat painter, lalubukams words artikelyang akandi ubah template, kemudian di'sapu'kan.

A screenshot of the Microsoft Word ribbon. The "Font" tab is highlighted in blue. A red circle highlights the "Font" dropdown menu icon, which is currently open, showing options like "Times New Roman", "20", and "Aa".

Abstract The instruction for the preparation of the full manuscript is detailed in this template file. The template is intended as a tool to assist you in the layout of your manuscript. It is encouraged that this template can be used for personal preference, you may import styles into your own manuscript. The process is divided into 4 steps:
Step 1: Click Show the Styles window (Figure 2);

- Kondisiformat painter tetapterblok
- Blok judulkalimatartikel, dengantandasapu, lalulepaskanblok
- Judulartikelakanberubahsesuaidenganhuruf, dan font dari template journal

Submitting

- Jika menggunakan OJS, masuk ke online submission, register dulu
- Login ke online submission dan ikuti langkah submit: isi data author dan paper, afiliasi, E-mail, corresponding author, upload paper, upload supplementary files, submit.
- Jika menggunakan email ke editor journal, siapkan lampiran yang diperlukan sebelumnya.
- Setelah submit, siapkan pembuatan paper berikutnya.

RUMAH SCOPUS

AKADEMI PENELITIAN

Rumah Scopus

About

Rumah Scopus berdiri pada 20 Februari 2019 yang berpusat di Bangunsari, Bangunkerto, Turi, Sleman, Daerah Istimewa Yogyakarta. Produk utama Rumah Scopus adalah penyedia layanan jasa di bidang pendampingan penyusunan artikel ilmiah dan publikasi artikel ke jurnal terindeks Scopus.

Perjalanan Rumah Scopus sudah memiliki jaringan Author Scopus lebih dari 500 diseluruh Dunia dan telah meloloskan pendampingan paper terindeks Scopus lebih dari 100 paper yang tersebar dari 10 subject area.

Visi

Menjadi lembaga profesional untuk mendampingi peneliti dalam publikasi karya ilmiah

Misi

- Menyelenggarakan pendampingan penulisan karya ilmiah
- Menyelenggarakan pelatihan penulisan karya ilmiah
- Menyelenggarakan kegiatan-kegiatan yang berkaitan dengan publikasi karya ilmiah

Strategi

- Simpel dan praktis : Training menggunakan pendekatan learning by doing menerapkan cara-cara praktis dan simpel.
- Trainer berkomitmen tinggi : Memiliki pengalaman terbaik dalam proses penulisan artikel terindeks Scopus
- Setiap pendampingan dalam training memiliki capaian yang jelas dan terukur
